Oct 14. Use this when in difficulty against caster teams and run safely. The gameplay itself is very simple. 2020: Updated aperture rotation. Another major stumbling block was the addition of covenant legends, one of the most critical issues we had in Nathria Castle was the severe lack of legendary vouchers. Use the 5-point section and section combined. However, when it is well tuned, its strengths can be beneficial and unique. You be able to generate combined points in different ways. Enemies of subtlety are severely lacking sustained damage, but compensate by controlling the pace of the game. Slice and Dice increases speed of attack. Shadowstrike can be used only in Stealth. 2.4. Damage sustained The damage sustained is a damage that is done when the barrage cooling is not available, and when your enemies cannot be controlled by the crowd due to diminishing returns. There's an example below, but remember that this will be true for all the other burst openings and rotations shown here. If the enemy healer or the slain target uses their trinket in the can opener, they're in trouble. Use Backstab to generate combined points. From Stealth, Subterfuge, or when Shadow Dance is active, there are 2 ways to generate Combo Points: Cheap Shot locks the target and generates 1 Combo Point. The rupture is a hemorrhage that lasts longer<sup>1</sup> depending on the number of points combined used. Having this buff up when you start the next configuration will allow you to obtain more<sup>1</sup> Combo Points with Passive Premeditation. Of course it can be used when the enemy team is using the cold on you, even if there is no stunning. Show more<sup>1</sup> Show less 2. You can also use it for crowd control with Sap and Cheap Shot. 2.2. The opener The opener refers to the DC of your team and damage caused as soon as you leave the gates. Below are the abilities in which the combined points will be spent and the situations in which they will be used: Kidney Shot is your main stun to set the crowd control crowd. The enemy healer or kill the target. Use this when the enemy team is using offensive cooling on you. Be careful not to break crowd control like Polymorph when using this capacity. The first, energy is quite simple. Use it only manually when a destination does not break. This is a very powerful tool to mitigate incoming damage. 2020: Rotation burst damage updated. 3. Use a spell costs energy, and regenerates over time. It also deals with further damage to the shadow for the goals with Find weakness on them. 2020: removed obsolete traits and essences. If you have lit crippling poison, the target by 70% will slow down for 4 seconds. also deals with further damage to the shadow for the goals with hind weakness on them. 2020: removed obsolete traits and essences. If you have hit crippling poison, the target by 70% will slow down for 4 seconds. Our ducts and legendary have seen some technical changes to host the new set of level, he won't enter too many details, but now he has his possibility of processing weaponmaster and it looks like Only do damage every 2 seconds does not matter what Deathspike has a bunch of bug fixes, not very relevant to us even if this is about for changes in direct subtlety. Shuriken Toss makes very few damage, but generates 1 combo point. Two new legendary obedience called obedience, and resolving clarity have crushed the value of our old options, resulting in a considerable damage bug. 2021: rewritten by Shadenox and updated for patch 9.0.5. 18 Mar. We are a guild trying to make the most of our three days of RAID a week to maintain a level of Horde Hall of Fame 1.1. Before Open Gates, discuss with your team to vote on members. inflicts a low damage and generates 1 combo point. Now it grants both Revenge and defensive Rush for 10 seconds after the last sign of sepsis. If you can get staff or other chemics, you can create a situation where your killing gear is stunned and you and your team can inflict damage, without any external help. Recent Changes to Patch 9.1 We have obtained a significant improvement of AoE damage to Black Powder and Hit enabler, Shuriken Storm. In most cases, you will have used your hit to the kidneys on the enemy healer to start the crowd control chain, so as to stun your target with Cheap Shot. Cloak of Shadows is a strong defensive cooling when playing against caster. Subtlety Rogue is a specialization that is played exclusively in the setups, and this means that you and your team must agree on those who control and those who kill before the beginning of the game, and you need to know who will use theirs offensive. This can be used for Kidney Shot to set crowd control, or for further evisceration during an attempt to kill. Similarly, if the enemy is an Orc or has Untiring, the stunners will be abbreviated and the open the open be different. The legendary Night Fae Toxic Attack has a decent-sized buff. Offensive Spin 2.1. Generating and Spending Combo Points Rogues have two resources to manage. Most of the mix specs have limited AoE capabilities to 20 targets in version 9.1.5, but it has a negative aspect for thinness. 2020: Spins updated to include Covenant Ability. 2021: Already updated with patch 9.1.5. Jul 4, 2020: Reviewed for patch 9.0.5. Dec 5, 2020 Subtlety's main problem is the same for all three rogue specifics; we don't have any utility raid. Apply wound poison and paralyzing poison. However, since it does not generate Combo Points you will also be forced to use Shadowstrike immediately afterwards to reach 5 Combo Points. Sometimes you want to gain control of the crowd over the enemy DPS to prevent them from using a defensive ability beforehand when you gain control of the crowd over their healer. Therefore, in order to keep the target in a stun at all times the sequence of the spell must be slightly modified. Otherwise, use Shadowstrike. Strengths Weaknesses Low target Weakness Lose a moderate amount of DPS during frequent periods of inactivity due to cooldown reduction (CDR) mechanics and resource acquisition from auto attacks No utility raid What's changed The latest patch doesn't make any direct changes to the subtle happiness in itself. The main objective in opener is to force your enemies to use their cooldowns. This should be used if you are slowed/rooted and cannot reach your goal, but are about to overload your energy. Stealth gives you the edge as you get to choose how to start the fight. Just remember that you must
